

Move your organisation to the next level of capability with aPlus+ Attendance Tracking

Gain visibility and raise quality of information with aPlus+ centralised attendance tracking software

The aPlus+ Attendance Server software solution provides tertiary education institutions with a comprehensive web based attendance tracking tool, for all staff, running alongside your existing student management and timetable management software — extending your capabilities.

aPlus+ Attendance Server gives you and your team the right tools to track attendance with consistency and accuracy, and the right information so that everyone can see what's going on. *Visibility* is important. Only a *centralised* attendance management framework can give you the consistency and accuracy you need.

Quick and easy to use

aPlus+ has been designed for ease of use and an enjoyable experience. aPlus+ clearly shows where and when to enter attendance. Forms are pre-filled to speed entry.

Know what's going on

Gain visibility. From system level information dashboards for management, through to qualification, course and session level attendance information, it's all there when you need it, complete with audit trails.

Accessible

Managing attendance is easy with our fully web based interface. In the office, at home, Mac or PC, open your web browser and go.

Raise information quality

Consistent collection of information in one centralised place gives you current, accurate information for solid decision making.

Integration ready

aPlus+ has been designed to plug in to, and be part of, your wider software framework. You don't have to replace existing software to benefit from aPlus+ Attendance.

Powerful reporting

Quickly pull up reports to summarize attendance by faculty, course, student, year, month, week, day of week. It's easy to know what's going on.

Flexible and comprehensive

Theory and practical sessions on the same day? Short courses or flexible delivery courses without fixed session dates? Classes or streams with different sessions? Multiple teaching staff? aPlus+ delivers

Assessment and results in one

aPlus+ also provides advanced assessment and results management all in the one integrated solution.

Flexible deployment options

Install aPlus+ on your own server, or host in the cloud — you choose. Either way you'll be up and running quickly and smoothly.

▲ **Information rich dashboards show you what's going on**
It's easy to see key performance information at a glance, with graphs and colour coded information. The example above shows recent attendance by region and a summary of all attendance to date.

aPlus+ Attendance features

Friendly and easy to use

- **Accessible web interface.** Interactive, dynamic interface enables users to get more done with fewer clicks.
- **Mac and PC.** Web based interface ensures accessibility to staff whether at work or at home, on PC or Mac.
- **Colour coding** makes it easy to see information at a glance. You choose the colours.
- **Consistent branding** is maintained as the aPlus+ interface can be customised to suit your branding.

▲ **Attendance registers** are colour coded showing attendance for selected periods and a summary of attendance overall for each student

Advanced attendance tracking

- **Configurable** attendance status options. You choose what kinds of attendance work for you, the colour and how attendance is affected by each status. Does 'late' attendance matter to you, and does it mean a student attended or not? You choose.
- **Shared courses** aPlus+ supports grouping multiple courses as one when students enrolled in different qualifications and courses are actually taught as one.
- **Multiple timetables** allow your practical and theory sessions to be managed separately.
- **Multiple streams or classes** are supported to the extent that each class can share and have different numbers of sessions and aPlus+ takes it all into account when calculating attendance rates.
- **Integration with assessment.** You define whether attendance affects course marks and grades. Perhaps the whole course grade depends on attendance. Or perhaps 15% or not at all.
- **As little or as much as you need.** aPlus+ lets you choose whether to define your sessions in plenty of detail or very little detail. Sessions can simply be numbered (Session 1,2,3...) or defined by date, time, duration, teaching staff and weighting. You choose.

- **Audit trails** are recorded so you know who set or changed what and when.
- **Advanced calculations;** aPlus+ allows you to control how attendance rates are calculated depending on session weighting and attendance status weighting.

Truly enterprise class

- **aPlus+ Attendance Server is enterprise class** server based software running on the industry standard Microsoft .Net framework and SQL Server database platform.
- **Throw away your paper based processes, spreadsheets and custom databases** - these can only take you so far. aPlus+ Attendance Server gives you the full web based, multi user, robust, accurate tool set you need to take your organisation to the next level of attendance tracking and reporting.
